

Build a Brilliant Bug-out Bag and Beyond!: Essential Preppers Kit to Keep Your Family Alive After a Disaster

Getting started with the concept of prepping can be a case of information overload. There is so much to think about and so much to do and purchase that people often give up on the idea before they even start. This audiobook is especially for those people, it tells them all about the first item any prepper should have ready - a bug-out bag. It explains what bugging out means and why they should have a bug-out bag with survival kit for 72 hours ready to go. The step-by-step approach means that it is easy to follow, meaning everyone can have a quality bug-out gear prepared for when a disaster strikes. It tells you exactly what is in a bug-out bag and gives you a list of bug-out kit items that you will need. None, of this bug-out gear is expensive, which means that everyone can actually have a bug-out bag ready to go when disaster strikes. The book explains why each and every member of your family needs to have their own bug-out bag and what that bag must contain. When disaster does strike, it is indiscriminate. It will hit everyone. It will be left to you to ensure that you can keep your family alive until help arrives. This book will help you do just that. The book covers essential information such as: The time to bug out Where you bug out to How to choose a bug-out bag Other essential bugging-out kit What items to pack and what to leave behind Water Food Medical Supplies Personal Items Education How to use technology to help How to make use of caches to make your survival easier and more comfortable The audiobook comes complete with a bug-out checklist at the end of each section so you can be ensured that you have all the kit assembled.
