

Daring YOU To Be YOU: Setting Goals: Track Your Goals to Track Your Success! (Volume 3)

Many researchers find that Emotional Intelligence (EQ) is more important than a person's intellectual aptitude in the evaluation of their ability to achieve happiness and success. Daring You to Be YOU! Track Your Goals to Track Your Success is a personal development coaching journal designed to guide you through setting goals and evaluating achievements in your life. This journal will provide you with an opportunity to bring your dreams into reality through the creation of a semi-structured plan to achieve your lifetime goals. You will focus on the development of goals that gives you direction towards successfully accomplishing whatever mission you set for yourself. You will obtain guidance in the prioritization of your goals as you evaluate your current issues that may block you from accomplishing your goals. You will design a plan that will enable you to attain success in your goals. You will learn how to apply F.E.A.R (Faith-filled Evidence Activating Reality) to obstacles and issues you face to cause your dreams to become a reality in your life. Daring You to Be YOU! is a personal development coaching series designed to help individuals to develop their emotional intelligence as they analytically construct and deconstruct their thoughts, emotions, and behaviors. Individuals are able to keep track of day-to-day reactions and activities, review their thoughts, and develop solutions as they go through the process of self-discovery. These coaching resource materials help to boost motivation as individuals consider lessons learned and what can be done to promote positive change in their life. The overall goal is to help the individual to overcome the fear of failure by framing setbacks and successes as opportunities for lessons learned. Each journal serves as a record of these experiences to create a personal success story of emotional maturity that leads to

personal development through the application of principles learned.
