

Trails & Travel: Nature Awareness Activities for Kids

In this book, Your Own Backyard presents a cornucopia of games and activities designed to challenge the five senses. Engaging for the whole family, all of the activities stimulate curiosity, imagination, and creativity. Optimized for mobile devices, this book is easy to use when you are out and about. Teachers of children, ages 4 through 12, will find it to be an ideal resource for all outdoor class events. The Senses Alive! activity develops sensory awareness and explores how our five senses connect us with our surrounding world. It is a still, yet active and imaginative engagement of all five senses working together to develop a quiet mind and an ability to be present in the moment with inquisitive focus. Many have discovered that engaging with nature in this way is settling for the distracted mind. Such awareness is also highly beneficial for the following: avoiding natural hazards, observing wildlife, developing empathy for the natural world, being street safe, and engaging in team sports. Senses Alive! lays the groundwork for the Nature Awareness Activity Cards. Each card offers a sense-based challenge or game. The Trail sets, created according to age, are designed for use when you are free to wander about and discover. The Travel set, for children of all ages, is designed specifically for when you are confined while on the road. Included in the package: * Senses Alive! activity * 120 Trail Nature Awareness Activity Cards using grade-appropriate common core vocabulary * 40 Travel Nature Awareness Activity Cards * 4 short original stories of nature encounters enjoyed by the author, told in the voice of a child * Senses Alive! Field Journal & Telling My Backyard Story pages * links to downloadables and on-line bonus features So now, with your device in hand, get out there and engage in the world of your senses!
