

Remote Viewing: What It Is, Who Uses It and How To Do It

Remote viewing is the ability to travel psychically out of one's body to remote locations. Scientist Tim Rifat reveals how remote viewing has been used in psychic warfare for more than 50 years and how the superpowers have used it to spy on each other . . . and on us. At the height of the Cold War, both the Soviet Union and the United States developed a new and terrible form of warfare called psychotronics. This school of espionage used ESP and psychic spying as well as telepathic hypnosis and even remote killing. Tim Rifat provides scientific explanations of how remote viewing works and detailed instructions on how to learn the techniques-information that is taught in the US on courses costing many thousands of dollars.
