

# Being as Symbol: On the Origins and Development of Karl Rahners Metaphysics

One of the most important theologians of the modern era, Karl Rahner is best known for his efforts to make Christianity credible in light of the intellectual questions of modern culture. Stephen M. Fields, SJ, now explains how Rahner developed his metaphysics as a creative synthesis of Thomism and the modern philosophical tradition. Focusing on Rahners core concept of the Realsymbol, which posits all beings as symbolic, Fields establishes the place of the Realsymbol in philosophical theories of the symbol. He particularly concentrates on those key aspects of Rahners metaphysics-his theories of finite realities and language?that have received insufficient attention. By examining a wide range of Rahners works in the context of twelve medieval, modern, and contemporary thinkers, Fields locates the origins of this seminal thinkers metaphysics to an extent never before attempted. He notes the correlations that exist between the Realsymbol and such work as Aquinass theory of the sacraments, Goethes and Hegels dialectics, Moehlers view of religious language, and Heideggers aesthetics. Through this analysis, Fields reveals the structural core of Rahners metaphysics and shows how art, language, knowledge, religious truth, and reality in general are all symbolic. Being as Symbol opens new perspectives on this important thinker and positions him in the broader spectrum of philosophical thought.
