

The Problem of Christ in the Work of Friedrich Holderlin (MHRA Texts and Dissertations)

This study sets out to challenge the usual approach to the question of Holderlins response to Christ, which focuses on no more than two or three late hymns, by tracing, through each major stage of Holderlins work, a series of latent Christological debates. These debates, in which philosophy, theology, and poetry converge, represent Holderlins engagement with the urgent intellectual issues of his day.
