

## God, The Universe And Darwin

If you have ever asked Where did I come from? and Why am I here? you will find it hard to put God, The Universe And Darwin down. If you are a Christian you will be thrilled to learn about groundbreaking discoveries pouring in from the sciences that confirm the words in the Bible. If you are an evolutionist this book should give you pause to reconsider your position. Today millions of people believe that the universe, the Earth and all the life on it evolved according to Darwins theory of evolution. Most people, though, are unaware that evolution has only been accepted as true because Darwins theories have been universally declared as non-disputable fact by Darwin advocates. All other evidence to the contrary has been ignored or rejected by this same group. Because of this, there is a growing legion of scientists who have completely rejected evolution as not only highly improbable but scientifically unprovable. In addition a host of new discoveries in astronomy, cosmology, and biology have confirmed that the universe, our solar system, the Earth, and all life on it illustrate an extremely high level of fine tuning that cannot be explained by any naturalistic process. Because of the absence of a natural explanation for this fine tuning the logical conclusion that has been reached is that this fine tuning can only be the result of the miraculous intervention of a transcendent creator, the God of the Bible.

What Richard Woodling brings to this debate is an easy and concise explanation of the current science behind not only Darwins theories but also Biblical creation. The book is unique as it is set in the venue of a trial with each side presenting their best evidence on the principles fundamental to our origins. You the reader are put in the role of final judge and jury to decide which sides testimony is likely correct. Being over two years in the making the facts uncovered about the true

nature of the evolution and creation debate are astounding. Take a free look inside. If you like what you see get a copy, you'll be glad you did.
