

## The Inevitable Box: a quest for significance

Clarke Allen found himself sitting in the dark of his 30,000-square-foot building with no work, no staff, and no marriage and no hope. It was a stunning drop for an event designer and planner who had created events for celebrities, socialites, sports teams and major corporations. Now he was at the brink of bankruptcy. Allen had a decision to make. He set out to discover how he could possibly go from being the go-to event designer in the Southeast to being an utter wreck, both professionally and personally. Placing the blame directly on himself, Allen wanted to find out why his craving to be significant had ended in such disaster -- and how he could create a life worth living. Clarke Allens gripping journey - including getting fired by Oprah Winfrey - makes compelling reading for anyone who has sought success and wrestled with failure as part of our human condition.
