

Cosmic Explorers: Scientific Remote Viewing, Extraterrestrials, and a Message for Mankind

In his groundbreaking book *Cosmic Voyage*, Courtney Brown revealed the existence of two extraterrestrial civilizations whose destinies are intertwined with our own. Using a system of subspace surveillance previously exploited by the U.S. military, *Cosmic Voyage* showed what many have long suspected: we are not alone. . . even here on Earth. In *Cosmic Explorers*, Dr. Brown takes his research a critical step further, in a riveting true story that expands humanities journey into the deepest mysteries of the cosmos. Based on unprecedented scientific evidence using Scientific Remote Viewing (SRV), *Cosmic Explorers* continues the search for extraterrestrial life, and sounds an important warning. I am quite impressed with Dr. Courtney Browns timely research on extraterrestrials as presented in *Cosmic Explorers*. The data may seem very far out, but with our new consciousness-based science drawn from recent advances in the interpretation of quantum physics, the data are supported by some of our theories. --Amit Goswami, Ph.D., Professor of Theoretical Physics, University of Oregon
In *Cosmic Explorers* Dr. Brown...clearly explains the mechanics by which scientific remote viewing is accomplished, presents verifiable demonstrations of the process, and then continues his quest to investigate extraterrestrial life. --Richard Moore, M.D.
