What if I want to text on a date? Which texts should I ignore? What if he stops texting? Excerpt from Chapter 16: Countless articles on the internet describe texting situations between men and women. They provide examples of texting etiquette for dating. One advises, Its not okay if a man texts to ask for a date. But, a text telling you that hes running late is fine. There are two problems with this advice. First, it fails to establish consistency in a relationship. Second, it is piecemeal and promises no specific result. It can be difficult to discern which moves will get the guy, and until now, there has been no system. Consistency in your relationship yields significant benefits. If you respond to one text and not the other, a man cant understand your standards, much less your motives. When you establish patterns that make a man ask you in a certain way for dates, he will approach other relationship milestones with the same respect: exclusivity, long-term commitment, the marriage proposal.
