

Divine Providence Gods Program for Humankind

Divine Providence: Gods Program for Humankind is a unique book that not only explores difficult, fundamental questions facing the modern world, but also creates a bridge between religions and philosophies by embracing the Divine in a very practical and rational manner. For centuries, the struggle between world views has caused division and conflict. But in this book, Christianity is reframed as a true expression of the Divine/human relationship, without denying or denigrating other major world religions. As society, especially Western culture, increases in diversity, the need grows for an interdependent view that encompasses wisdom and knowledge of both the ancient and modern world, as well as integrating the coexistence of science and religion.

Divine Providence: Gods Program for Humankind comingles both personal and society morality into a world view that embraces and satisfies both. The book challenges readers to consider ones own personal responsibility, as well as the collective responsibility that comes from being a citizen of this global network, called oneness. From the choices we make day to day, to how we interact and behave, Divine Providence: Gods Program for Humankind explores not only what is relevant in this life, but also, the life to come. Author Robert Alden Gunderson is a retired construction engineer with personal experience with widely divergent cultures. He is a lay minister who has spent over 45 years grappling with the theoretical and practical issues of religion and society. Gunderson resides on Hawaii's Big Island with his wife, Trudi, and lives near his three adult children, Geoffrey, Jennifer and Michele.
