

Witch of the Fall (Forests of Exile Book 1)

There are no witches in the Holy City of Acadia, or so the Living Prophets claim, after having burnt a thousand women at the stake. But Faye, a warrior-witch from a sanctuary in the mountains, knows that some still remain alive, and is determined to try to save them. At the same time, far to the west, Arlana and Ared, a beggar and a murderer, are forced to flee into the forests. Alone and with no one to turn to, they accept help from a sorcerer and his non-human allies, only to find themselves embroiled in a war with an adversary planning to destroy all of Acadia and everyone who lives there. Seeking these young people are the divine rulers, the Patriarchs, three-hundred year old necromancers who envy youth, detest progress, and jealously guard all knowledge for themselves. For despite their power, they are afraid. Somewhere within their realm walks the Witch of the Fall, prophesized to put an end to their reign of terror. They must find and destroy her before she leads the populace in rebellion against them. But who exactly is she, and how long can she remain out of their reach? --- Strong storytelling and scene setting ... crisp, clean style, Andrew Robins
