

## Eyes Afire: Rise Of The Warrior

Imagine if you were so poor that you lived in a tent. What if one night you had a dream where you saw scenes different futures? Imagine if some of those scenes were of an apocalyptic event. What if that event could kill billions and change the world forever? Imagine if you were told in that dream that you had to save the world. That if you didnt everything you love and chairs would be destroyed. Imagine if everything in your dream started to come true. What would you do? This story is about that person. I have always felt the scariest books are the ones that really could come true. . This story is set in the near future. The novel is science fiction, border lining on super natural. Highlighting a lot of new or near future technology, used in some of the very worst ways. It will show you that all the guns and bombs in the world wont keep us safe. This book is based on a Native American legend. The Rainbow Warrior You will experience the Incredible rise of the Warrior to world recognition in just days. Meanwhile, the Emperor takes control of most of Asia and the United States, he is hell bent on ruling the world. He has a plan that will bring the world to its knees and while its on its knees, the Emperor plans to take it. When it seems theres nothing standing in his way, nothing but a young girl named Liberty, who has eyes afire, they called the Warrior. In the beginning chapters you will meet a lot of unique characters in lots of different places, such as New Jersey, Beijing, Washington DC, Shawnee National Forest, a small town in Texas, and outer space. From midway on It becomes a wild roller coaster ride of mystery, action, and drama. So if youre looking for a novel thats new and exciting, but different, and will leave you thinking. This is the novel for you. This novel was designed to play extremely well on text-to-speech programs, like your Kindle reader. It works extremely well using the female voice Zira at -1 speed, or

mail voice Paul at -1 speed. You will be surprised how human those two voices sound when reading this novel. So if you're looking for something for a trip, or your eyes just get tired of reading have it read to you and you can enjoy this novel anywhere, anytime. There are so many things and characters in this novel that it's hard to summarize. So I have prepared a list of people and things. There is science fiction and nonfiction, love, hate, romance, drama, action, humor, suspense, mystery, horror and cheating. There is an Asian Emperor, chairman of China, president of the United States, and the leader of the Comanche nation. There is politicians, news anchors, attorneys and doctors, scientists, Secret Service agents, and secret agents. There's great friends and mortal enemies also an artificial intelligence, a dog, and bombs. There are truck drivers, bikers, cowboys, Native Americans of different kinds, a Catholic priest, a Baptist preacher, a minister from Atlanta, religious leaders, tribal elders, and a religious fanatic. There are generals, a housewife with children, big trucks and big guns, micro-organisms, and micro-robots. There are zombies and zombie soldiers, but not the brain eating type. There is horses, fast cars, motor scooters, attack helicopters, jets, rockets, lasers and a tank, particle beams, and a secret spacecraft. Astronauts, and cosmonauts, space Marines, regular Marines, assassins, and lots of commandos. There is a war in space, the fall of China and the United States, the rise of the Rainbow Warrior, and the story about a girl with Eyes Afire. And of course, the strange blanket that ties it all together. One of the most noteworthy things about this novel is all those things above are put together in a way that is believable. Coming soon, Book 2 in the Eyes Afire saga: Dragon Storm.
