

## The Flying Saucers Are Real

The true story behind the strangest phenomena in history! During my long investigation of these strange objects, I have seen many reports verified by Air Force Intelligence, detailed accounts by Air Force pilots, radar operators, and other trained observers proving the UFOs are high-speed craft superior to anything built on Earth. In a personal, no-nonsense style, Major Donald Keyhoe in *The Flying Saucers Are Real* provides the details of his investigation: he talks with the witnesses, reviews the history of the phenomenon, and attempts to pry open the secrecy lid the Air Force had clamped down on the subject of UFOs. Well known in the UFO community as an author and as the director of NICAP, Major Donald Keyhoe was a Marine pilot and established author well before the flying saucer craze of the late 1940s. He authored several books on unidentified flying objects, including the classic *Flying Saucers Are Real*. When the first flying saucer sightings were reported in June, 1947, Keyhoe, an experienced pilot, was skeptical. True asked him to investigate UFOs in 1949. He interviewed numerous pilots as well as military officers in the Pentagon. Keyhoe discovered that expert observers had seen the unexplained discs, many at close range. His article *Flying Saucers Are Real* in the January, 1950 issue of *True* became one of the most widely read and discussed articles in publishing history, and caused a sensation. In January, 1950, the article was expanded into a paperback book. In 1957, Keyhoe became Director of the newly formed National Investigations Committee on Aerial Phenomena (NICAP) in Washington, DC. Under Keyhoe's leadership NICAP gave serious publicity to the UFO phenomena throughout the 1960s and encouraged subsequent Congressional hearings.
