

## The Mosquito and the Sign of the Cross

Imagine an artist having created a master piece. The creator can recognize his master piece, but can the master piece recognize its creator? The creator can find his master piece, but can the master piece find its creator? If you already have, without success, attempted to find your Creator, The Mosquito and the Sign of the Cross will help you recognize Him, by showing you how He finds you... This book is divided in three main sections, and enlightens the relationship between two aspects that influence you; the material and the immaterial aspects of reality. It addresses all people; all ordinary human beings tired of the non sense they are preached. Section 1: The philosophy of a doubting man You will discover reality; a reality that resembles mine; a reality that resembles yours; a reality full of questions. Section 2: The logic of a doubting man Long and redundant section, but necessary like the redundant act of breathing insures survival. Section 3: The illumination of a man that no longer doubts A message of Christ, as misunderstood by all Christians that followed Him, while organizing a religion around Him. Wasnt His main goal to destroy organized religion, usually leading to the control of powerful individuals and to discrimination that still survives? Your read will take you from happiness to discouragement. Isnt that the normal path of a normal life in search of comprehension? Patience is a virtue. Havent you waited enough?
