

Chinas Financial Markets: An Insiders Guide to How the Markets Work

Chinas financial markets represent about \$2 trillion and are expected to grow to about \$10 trillion by 2008. As these markets continue to open to outside investment, a thorough understanding of how they operate will be essential for success. In this book, Salih Neftci, an expert in finance whose teaching and research span North America, Europe and Asia, and Michelle Menager-Xu, a Chinese finance professional currently working in Geneva, bring together an unprecedented collection of Chinese insiders who are experts in their respective industries. These experts provide a detailed description of the banking system, the money, equity, futures, FX, and bond markets, the insurance sector, the mortgage market and mortgage instruments, and the regulators. Readers will learn how each of these financial sectors operates, how the government, regulators, and the central bank are involved, each sectors history, size and projected growth, an analysis of its current situation and discussion of future trends, the major players, and how the game is played.
