

Free God Now!: How to Liberate Yourself from Old Time Religion & Just Maybe Save the World (Volume 1)

Terrorism, culture wars, climate-change denial, religiously fueled violence taken together, they pose an existential threat to civilization -- and they all spring from the same source: Old Time Religion. If civilization is to survive, its high time for people of good faith to reform the religions of the world. So argues a startling new book from Huffington Post science and religion writer Clay Farris Naff. In *Free God Now!* he offers a new paradigm for reform. Good Faith, he says, is not a religion but a set of clear, rational, science-compatible principles that can empower people to make positive change in whatever tradition they happen to find themselves. *Free God Now* is an appeal, he writes, It is a plea to you to look into your heart and free God from the prison of ancient theology.
