

Gold Digger #106 (Gold Digger: 106)

Thanks to her student, the grass wizard Alena, Ginas excavation of Tuala has located a city-sized myconid pod in the molten rock surrounding the buried fortress, immune to the lavas heat. Within it, thousands of plant-like creatures resembling powerful, armored vehicles have been waiting for an opportunity to return to the world above. Ginas not about to let Alena examine the pods plant-magic and botanical-tech secrets firsthand, as its too dangerous. However, with a little help from fluffy-minded relic expert Aljabra, Alena might reach the myconid pod anywaybut will she live to regret meeting the evil of all roots?
