

## Think Big

When one of us is threatened, we are all at risk. We are all involved in this journey called life. We must keep an eye out for one another and make an extra effort to encourage one another. We are the creator of circumstances for ourselves and even for our people. The greatest enemy of the human being is the fear of fear. Fear is psychological and caused due to expressive stress and strain of the activity and modern world. Selfreliance is the key to success. Remember if you want to live in peace, ignore the minor skirmishes with your familymembers. It is natural to have difference of opinions and minor arguments with wife, children, parents, sibling etc. Why not to ignore the minor issues and focus on the major issues which will lead us all to the path of attainment and contentment. Thats life! If we face our problems and respond to them positively, and refuse to give into panic, bitterness, or selfpity, we can have a better and more fulfilling future. This book is full of such motivational discourses that are going to change the course of your life, but then, you must have the intense desire to change yourself.
