

# In Search of Evidence: Why We Need to Rethink God and Religion in the 21st Century

Does God exist? Man has not been able to give a credible answer to that question despite advances in knowledge. As a result, the world remains confused about religion, and whether to believe claims made by sacred books like the Bible and the Quran. Is it true that unbelievers would end up in Hell? Did God give Moses the Ten Commandments and the other 600 laws of the Old Testament? Did God reveal the Quran to Prophet Muhammad? To answer these and other questions, In Search of Evidence looks at passages taken from various Scriptures. It contends that while we may not be able to conclusively determine whether God exists or not, there is enough evidence to determine whether the contents of the sacred books of the worlds religions were revealed by an omniscient being [God]. Religion does not need to be taken on faith. This book provides a framework for meaningful and objective, rather than a faith-based search for the truth.
