

## Preservation of fruits and vegetables Pickles, jams and sauces

Fruits and vegetables during season, available in farms and gardens in abundance, are preserved in the form of pickles, jams and sauces throughout the world since time immemorial. The method of pickling is the oldest method of preservation known to human beings. The taste and method of preparation differs from place to place and family to family and are passed on from generation to generation. People who make pickles are no lesser artists. A meal cannot be complete without them. Home-made jams and sauces without artificial colour, flavour and preservatives are no health hazard and a pleasure. The pickles in this book are collected; some of them improved and modified over the years, and they are worth trying.
