

Life Out of Order: A Story of Sibling Loss and Living with Traumatic Brain Injury

This is a story of grief, healing, hope and love. This is the author's life as it relates to her three brothers. It is the story of what happened to them. It is a story of holding on to oneself in the midst of six siblings and rediscovering oneself while losing them, one after another. It is a very personal, inspiring story of sibling life and sibling loss. Sally's life is an extraordinary story of losing 2 brothers to death and 1, in large measure, to a traumatic brain injury. Her book will have special resonance for folks who have lost siblings, who are caretakers for disabled siblings, or who are in recovery, but you don't need those exact experiences to identify with Sally's powerful words. About the author: Sally Laux is founder and Director of the Quakertown Wellness Center in Lewes Delaware. She is an RN and an Acupuncturist who has studied, practiced and integrated Western and Eastern medical philosophies since 1979. Her own healing has called on applying her spiritual practices to transform her grief. As an author her book chronicles her experience of grieving and her attempts to make sense of the various ways of losing her siblings. Cumulatively the impact on her life has brought her to a place of deeply knowing that by accepting these tragedies she is alive in a way she never could have imagined.
