

## Magic, Science and Religion and Other Essays

Three famous Malinowski essays! Malinowski, one of the all-time great anthropologists of the world, had a talent for bringing together in single comprehension the warm reality of human living with the cool abstractions of science. His pages have become an almost indispensable link between the knowing of exotic and remote people with theoretical knowledge about humankind. An important collection of three of his most famous essays, Magic, Science and Religion offers readers a set of concepts about religion, magic, science, rite and myth in the course of forming vivid impressions and understandings of the Trobrianders of New Guinea. Also by Malinowski and available from Waveland Press: Argonauts of the Western Pacific: An Account of Native Enterprise and Adventure in the Archipelagoes of Melanesian New Guinea, Enhanced Edition (ISBN: 9781478602095).
