

# Meta-Regression Analysis in Economics and Business (Routledge Advances in Research Methods)

It is a systematic review of all the relevant scientific knowledge on a specific subject and is an essential part of the evidence-based practice movement in medicine, education and the social sciences. However, research in economics and business is often fundamentally different from what is found in the sciences and thereby requires different methods for its synthesis. Meta-regression analysis. This book develops, summarizes, and applies these meta-analytic methods.
