

Renewing Christian Theology: Systematics for a Global Christianity

Christianity's center of gravity has tilted from the Euro-American West to the global South. Driving this shift is the emergence of charismatic renewal movements among Protestant, Roman Catholic, and Orthodox churches. This reshaping of the theological landscape has inspired prominent theologian Amos Yong to construct a cutting-edge theology for the twenty-first century. Within a Pentecostal and evangelical framework, Yong's *Renewing Christian Theology* is a primer on how to think theologically in a global context. Students seeking an introduction to systematic theology will not only discover the treasures of the tradition but will also encounter a revolutionary pastoral theology that bridges Pentecostal, charismatic, evangelical, and ecumenical traditions. Yong's theological imagination prioritizes Christian hope, gifts of the Spirit, baptism, sanctification, and healing. *Renewing Christian Theology* unveils an inclusive theology conversant with contemporary theological movements: theology and science, contextual theologies, intercultural theologies, theology and disability, public theologies, theology and the arts, and theological aesthetics. *Renewing Christian Theology* is theology for the twenty-first-century church.
