

Secret London Churches

This is a book about secret London churches. In these pages you will find a wealth of smaller and larger churches around Central London and in particular, the City of London. Each of them has something interesting to tell us, whether it is some unusual piece of history attached to it or the final resting place of someone famous. There are photographs illustrating each of the churches featured here. London has a colourful history stretching back over two thousand years and our stories will cover the Roman occupation, the Saxons, the Great Fire of London, the Great Plague and the Blitz. Throughout all these periods these churches were not only places of worship but were also witnesses to events and to the people who lived during these times. They were baptised, married and buried at these sites. This book is another in the series The 60 Minute Guide to and provides clear and concise information about each subject in approximately one hour of reading. But for most readers, it will take a little more time to absorb the subject. Churches are constant witnesses to our history. We walk by them without much more than a glance. It is hoped that by the end of this book you will appreciate the secrets they are only too willing to give up if we only take the time to look.
