

Shell Tones

Perhaps because of his being a teacher of mathematics and an avid student of cosmology, the author has acquired an expectancy of alternatives such as not positive, then negative or not rational, then irrational all the way to not matter, then antimatter, not relativity, then quantum physics. This has led to the what if factor demonstrated in this novel. What if (to the power) a man can hear distinctive sound emanating from paintings in a museum? To what end you might ask; a hobby of cataloging masterpieces based on tones from one to three? But what if (to a higher power), in the presence of a foreign object the original painting becomes permanently silent, as silent as a print or a movie poster. What did the painting have that the poster didn't have? What, then, did it lose? Is this cause alarm? In *Shell Tones*, it is.
