

Spiritual Healing in a Scientific Age

This provocative study addresses some of the most challenging questions of our times: * Is healing a science or an art? * What is the place of spiritual healing in our scientific world? * What place does prayer have in a technocratic society? * Is spiritual healing a rational option today? * Does Christian Science, in actuality, work? While based on the authors expert knowledge of Christian Science, this lively text offers a universality that will appeal to many traditions. Most important, this book contains many personal testimonies - real experiences in spiritual healing - that offer evidence and inspiration to both skeptics and believers.
