

Stonehenge and Other British Stone Monuments Astronomically Considered (Forgotten Books)

Book Description: After centuries of speculation the origin, purpose, and construction of Stonehenge is still a mystery. Out of the hundreds of books on the subject, a few stand out. Lockyers careful survey of the monument and other Northern European megaliths is one of these. Lockyer, who had spotless academic credentials, raised some of the themes which would dominate mainstream theories of Stonehenge during the 20th century, particularly his focus on archaeo-astronomy. Lockyers primary hypothesis, that Stonehenge and other megalithic constructions were ancient observatories, is still considered plausible. He also noted the vast alignments of sites which covered the landscape, both in Britain and in northern France, anticipating Alfred Watkins discovery of ley lines by over a decade. On the other hand, his conclusion that Stonehenge was constructed by immigrants from the Near East was, even then, controversial. The use of large stones to construct monuments was global in nature over a long period of history. Lockyer rolls out the well-known folklore evidence for Celtic tree, well, and stone worship, which had parallels in ancient Near Eastern paganism. However, the people who constructed Stonehenge were pre-Celtic, and their religious beliefs are still a matter for speculation. This isnt to say that his hypothesis is implausible, just that there is no concrete evidence to support it. (Quote from sacred-texts.com) Table of Contents: Publishers Preface; Preface; Introductory; The Astronomical Divisions Of The Year; The Agricultural Divisions Of The Year; The Various New-year Days; Conditions And Traditions At Stonehenge; General Architecture Of Stonehenge; Astronomical Observations At Stonehenge In 1901 ; Archeological Observations At Stonehenge, 1901; Was There An Earlier Circle?; The May And June Worships In

Brittany; Astronomical Hints For Arch?ologists; Astronomical Hints For Arch?ologists; Stenness (lat. 597 N.); The Hurlers (lat. 50 31?
