

Stress (LAB Topical Studies)

Complete with application notes, thought-provoking questions, and relevant Scripture passages, the Life Application Topical Studies are perfect for group leaders, teachers, or anyone looking for spiritual insight on today's important issues. Each Bible study guide contains six lessons on the featured topic. Key Bible verses are presented in three different versions of the Bible (King James Version, New International Version, and New Living Translation) so readers can choose which translation they want to use, or compare and contrast different versions. Discussion questions help readers think about practical ways to apply the truth of the Bible to everyday life.
