

## Extraordinary Creativity: = Thousands of Harry Potter stories, innovative designs, world wonders, business concepts, and scientific theories

Every living and non-living thing in the universe can be categorized as ten key structures such as anatomy, architecture, cluster, concept, design, force, fusion, institution, mechanism, and spectrum, and these ten types of structures can be classified into several other categories. In this book, ten types of structures and micro structures (features of structures) of ten structures are combined with appliances, lights, and facial organs in order to create unlimited extraordinary services, products, designs, and structures that can be used in performing innovative research, making film stories, writing fiction plots, drawing and painting arts, creating designs, designing and decorating buildings, generating new business concepts, developing novel websites, software, and games, creating funny images, playing imaginative games (imaginative games mean creating miscellaneous imaginative scenes and structures for fun and entertainments), and for several other reasons and purposes.
