Ever since the dawn of human life on this planet, Man has always sought to understand Nature, his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Quran, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains Divine guidance for all humankind. Since the message of the Quran is believed to be for all times, it should be relevant to every age. Does the Quran pass this test? In this booklet, I intend to give an objective analysis of the

Muslim belief regarding the Divine origin of the Quran, in the light of established scientific discoveries. There was a time, in the history of world civilization, when miracles, or what was perceived to be a miracle, took precedence over human reason and logic. But how do we define the term miracle? A miracle is anything that takes place out of the normal course of life and for which humankind has no explanation. However, we must be careful before we accept something as a miracle. An article in `The Times of India, Mumbai, in 1993 reported that a saint by the name Baba Pilot claimed to have stayed continuously submerged under water in a tank for three consecutive days and nights. However, when reporters wanted to examine the base of the tank of water where he claimed to have performed this miraculous feat, he refused to let them do so. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. The `Baba was hiding something. It as a gimmick simply to gain publicity.
