

The Business of Love: 9 Best Practices to Improve the Bottom Line of Your Relationship!

Can you take the same best practices that build a successful business, and apply them to your marriage? Would you find happiness, even true love, in your, in your joint venture? Absolutely, says Dr. John Curtis, one of the countries leading organizational development consultants and a former marriage counselor. The Business of Love is the first book to apply proven business strategies to divorce-proof intimate relationships. Business of Love can even result in a turnaround of a once-rocky relationship. Pinpointing the reasons for the decline in marriage, which is at a forty-year low, author Dr. Curtis explains why young people not only are postponing marriage later than ever but most believe that single people are happier than those who are married. The book provides a step-by-step approach on how to apply business concepts to marriage, such as writing a marital vision statement or a detailed job description for the husband and wife, or how to set up a performance appraisals process and compensation system for a marriage. Review: This provocative, groundbreaking book may be the must-read relationship book of the decade! -- The New York Times Book Review Dr. Curtis proposes the most creative and useful application of business concepts outside of business that I have ever seen! -- Kent Evans, author of Malas Ondas This book is a bright ray of hope to overcome so much of what is troubling marriages today! -- Anthony Zolezzi, author of The Detachment Paradox
