

Our Monsters (The Our Monsters Chronicles Book 1)

Yesterday Jon Graves believed living and going to high school in the military occupied town of Carpenter was a snooze-fest. That is until a routine field trip to Carpenters science labs, when Jon and his friends uncovered a military secret, the reason why the US Army stationed their parents in Carpenter to create a top secret, genetically engineered species of monsters.

Yeah thats right MONSTERS! Now Jon and his four friends have liberated and adopted five of the monsters, vowing to keep the five monsters hidden away from harm. Harm being their parents and the US Army. These are not puppies and kitten, though. Keeping the monsters a secret turns into a difficult task when each one begins to develop amazing powers. And soon a betrayal from within the circle of friends will threaten to unravel the groups plans. In order to keep the promise his friends and he made and prevent the Carpenter military from subjecting each monster to further inhuman experiments, Jon will need to bring his friends together for a rescue mission. Mysterious powers the teens begin to exhibit will offer aid but ultimately the groups friendship will save the day. Its just another chaotic day in high school yeah, right!
