

## The Pillars of SPACE

Isn't success a strange word - one with so many different meanings and nuances. Different for different people and different for the same person in different circumstances and times in their life! There is however one abiding factor that can reliably create an impact, a multiplying effect, a rocket-boosting power to success (by any definition) and that factor is personal development. Unfortunately for so many that very term personal development or its cousin self-development have been tainted by the over-exuberance and hype of those who would have anyone believe that success is easy. Unfortunately it isn't! It's simple certainly but easy - no! You and I are lucky inasmuch as we have seen through the hype and realised that to become successful and more importantly BE successful we have to indulge ourselves, immerse ourselves, surround ourselves with continual self-development. How do I know we're so similar? That's easy - you're reading Clive's book now and must have the intent by so doing to make a positive difference to yourself and to those for whom you care. So what's so different about these pages you hold in your hand at this moment? Let me take just a moment and share my thoughts with you: We learn when we're emotionally involved in learning - true? Just think of those boring lessons we suffered back when we were kids - that teacher whose main aim was to get through the material as quickly as possible so that he could get back to the chat and a quick smoke in the staff room. Few and far between for many were the real teachers whose passion in life was to improve the minds of those in their care. And what did we learn when we were bored? Very little! When engaged with the teacher and the subject? Lots! And now as you read through the trials, tribulations and triumphs of Sam the oldest way of discovery will again play its part. You'll feel what Sam feels, you'll empathise with his situations, you'll smile

as his realisations become your very own. Clive Hall has managed to do what few writers ever do. He has created a character, a story, a set of circumstances that get us to learn without knowing were doing it until suddenly as each point slowly reveals itself we chuckle to ourselves and murmur I get it! In my opinion, no one whose intent on enjoying this marvellous adventure called life, can help but be moved, mesmerised and self-motivated by their journey through these pages of truth.
