

# Natural Theology: or Evidences of the Existence and Attributes of the Deity AND Evidences of Christianity

Paley's work, and *Natural Theology: or Evidences of the Existence and Attributes of the Deity* in particular, is admired for its rigorous and logical treatment of evidence. He examines the natural world: plants, animals, the human anatomy and the heavens, and from the intricate details he deduces the existence of a benevolent deity, primarily by the now famous watchmaker argument. Though most remembered for *Natural Theology*, Paley received numerous ecclesiastical honors, including a stall in St. Paul's Cathedral, for his earlier work *Evidences of Christianity*.
