

The Truth Agenda: Making Sense of Unexplained Mysteries, Global Cover-ups & Visions for a New Era

Why do so many people now believe in conspiracy theories, and what is the evidence to support them? What is the meaning of the many prophecies which say that we are now in a New Era of massive change? Why is there such huge but officially undeclared interest in paranormal phenomena from authorities and religions? How does all of this tie together and explain the agendas of control and surveillance in the West? The Truth Agenda explores some of the most famous unexplained mysteries and global cover-ups of recent history, including UFOs, pyramids, psychic phenomena, visions of the future and ancient prophecies, and investigates their connection to famous conspiracy theories concerning the Moon landings, 9/11, the New World Order and claims that the world is covertly run by a powerful ruling elite. Leading mysteries researcher Andy Thomas pulls these many threads together in a refreshingly accessible and stimulating overview, addressing the issues in a credible analysis which suggests that the world we live in may be very different to the manipulated picture presented by governments and the mainstream media. Many people believe that a secret global cabal is anticipating some kind of imminent huge change, based on ancient prophecies, and that it has been implementing a regime of draconian restrictions by nefarious means to ensure it retains its control throughout. Is a spiritual and philosophical revolution about to transform this situation, however, and if so what part can we all play in it..? This full-colour, high quality production, by renowned mysteries researcher Andy Thomas, includes nearly 200 photographs and has been widely acclaimed as the best guide of its kind. This latest third edition is fully updated and expanded with new material, including an extra Appendix chapter.
