

Therapeutic Parenting in a Nutshell: Positives and Pitfalls

A concise, clear overview of Therapeutic Parenting with integrated links to short inspirational, often humorous videos, demonstrating practical applications of therapeutic parenting techniques. Suitable for all carers, parents and supporting professionals working with children who have suffered early life trauma. Sarah Naish uses her first hand experience to clearly explain the differences between standard parenting and therapeutic parenting, with case studies and examples of good therapeutic parenting strategies, along with practical applications. Written with the busy parent and supporting professional in mind, this short book provides answers for all those caring for children with attachment difficulties, explaining why we need to parent our children differently, common additional challenges faced by Therapeutic Parents, and the best way to resolve them. The book may be read as a stand alone document, but used in conjunction with the videos and video based courses, it provides a powerful foundation in caring for children who have suffered early life trauma. The author provides essential advice to supporting professionals about overcoming blocked care, and helping Therapeutic Parents to stay connected to their child. This book contributes to the new Level 3 Diploma in Therapeutic Parenting, which will be launched by Fostering Attachments Ltd, (Inspire Training Group) in the Autumn of 2016.
