# Goatman

During the past half century, teenagers with overactive imaginations have concocted a legend that was intended to strike fear into the hearts of their friends. Parents, being just as devious, have come on board with the legend and made use of it as a mechanism of parental control. But, some have actually encountered a creepy, scary creature which has made the legend come alive. Is there a real creature out there somewhere, one that is half man and half goat, which terrorizes those unfortunate enough to cross its path? The author has researched the Goatman and written this book, but not before he returned to his hometown in Mothman territory to seek out the possibility of the existence of such a creature near Point Pleasant, West Virginia.
