

## THE PROOF that God exists and the Bible is true

Conclusive Scientific Proof (stated as 10 proofs) that God exists and the Bible is a reliable source of truth. Includes NEW scientific, logical, experiential and statistical evidence. This book shows, in simple ways, how proof of God and the Bible are backed by science and logic ... not only as truth, but also as giving us the most beautiful and rewarding ways to approach life. It also shows how the general mainstream perception that religion and science don't mix is incorrect, and how many modern theories have been falsely concluded based on data from unreliable methods and unproven axioms. Scientific proof that there HAS to be a God (more specifically: a non-physical, powerful, intelligent, eternal being) behind the creation of the physical universe. Why atheism is logically impossible. Historical proof that other ancient cultures (e.g. Greeks) told the same Adam & Eve Garden of Eden account as the Bible, but saw the serpent as the good guy because he brought enlightenment to man. Historical and scientific proof that the Genesis flood was an actual worldwide flood (as reported by many cultures all over the Earth). Scientific proof of a young universe and a young Earth (as the Bible says). A scientific solution to the distant starlight problem (that is, if the universe is relatively young - approximately 6,000 years old as the Bible says - how can we be seeing light from galaxies that are billions of light years away?) How when science, logic, experience and statistics are taken to their nth degrees they end up proving that God exists and the Bible is true. Scientific proof that Darwin's theory of evolution does not explain how everything came into being and that the Bible's description does. A solution to the who made God? dilemma. A logical answer to how can an all-good, loving God allow evil and tragedy? and why these are actually ultimately good things, and it would be imperfect and

unloving not to have them Proof that we are a spirit, and not just a body with a brain An exposing of some of the missing link hoaxes that have been constructed in a desperation to support Darwins theory, and how their perpetrators were proven wrong and some even convicted in courts. A mathematical proof of how God can be omnipresent. How all proven supernatural occurrences (that is, where the laws of nature are broken) that have been verified by a number of scientists are tied to Christianity, and there are no proven ones outside of Christianity. How there has been a \$250,000 offer for many years for anyone who could prove evolution ... but there have been no takers. How there has been a \$1,000,000 offer for many years for anyone who could prove a paranormal occurrence ... but there have been no takers. Plus a LOT more little known scientific proven facts supporting God and the Bible, which can be seen at ConclusiveProofOfGod.com. If you, or anyone you know, have any questions about the existence of God and the validity of the Bible ... even from the viewpoint of science ... this is the best book on the market to resolve those questions. But it is mainly in lay men and womens terms, not science speak or difficult science concepts.
