

My Teenager Wastes Time on Video Games

A little online gaming is good, but a little goes a long way. If you feel as if your child is spending too much time playing video games, you are certainly not alone. Before video games were introduced to the public, kids had to actually go outside and find friends to play with or hang out with! These days, kids spend more time on their computer surfing the web or playing online games than ever before, but how do you know when it is too much? That is what this guide is all about. If you are a concerned parent who is worried about their child's online gaming, then this guide is for you. In this book you will learn:

Warning signs of video addiction. How to teach your child to prioritize. Social aspects of online gaming. How to find other creative outlets. How to find shared interests. If you find that your child is spending too much time in front of a game console, you might want to stop and ask yourself if you and your child could benefit from more time spent together. It may not always be easy to make those sacrifices or to devote more time for your children, but as a parent making sacrifices is what we do best in the end. You are an important role model for your child, and the time you spend with them in these early years, is worth its weight in gold. You will never get these precious years back, so there is no time like the present to start interacting more with your child. In the end, the sacrifice will be well worth it!
