

Dimensions: A Tale of Gods Infinite Love and Mercy

What do you think is causing all this heat, Reverend Bundy? Has God decided to cook us? Ms. Dewey, ordinarily that would be a reasonably funny comment, but today it isn't. No, I think that what we are witnessing around the world and here in the United States is the result of our rejection of God. We should pray that He has mercy on us, because we are living in a very bad, spiritual time. Reverend, are you saying that God is out to get us? God loves all his children, Christine; however we have lost our way. I think this worldwide heating of the earth is a wake-up-call for us. Reverend, my education is not in Theology, so what do you mean by lost our way? Well, for the past fifty years, our wonderful land of freedom has allowed God to be gradually erased from our educational system and government. Practically all references, books, Bibles, and statues pertaining to God have been removed from our schools as well as all government facilities including court buildings. As a nation, we have removed almost all mention of God from our laws, public places and even our currency. We have replaced our religions with an atheism based on rationalism and humanism. At one time, Americas religions formed a moral safety net for our society by proclaiming the gospel message of salvation through love of God and neighbor, warning us about falling into a pit of immorality, violence, and wickedness. That safety net is no longer as strong as it was. Some say our society has lost its moral compass and become decadent, almost pagan, like the civilizations of ancient Rome, Greece, and Egypt. The majority of our European brothers and sisters don't practice their faiths, and look at what has happened to their countries. The same is happening here in the United States: Our churches are closing due to diminishing congregations. And look at our government: almost

weekly we hear of politicians being exposed of corruption or immoral behavior.

Our courts render decisions that, at times, are no longer exclusively-based on our legal precedents and Constitution. Instead, they are increasingly based on the biased, humanistic ideologies of Judges and Justices who render opinions and judgments gleaned from legal precedents established in foreign courts many of which reside in countries whose laws do not agree with the moral and ethical principles inherent in our Constitution.

Our schools and classrooms are becoming unsafe places, particularly in inner cities where there is so much brokenness in families, so much poverty, substance addiction, and violence. Schools, mainly in our large cities, have lowered academic standards to accommodate and graduate angry, undisciplined young adults who, in many instances, enter the workplace with reading skills at a sixth grade level. To financially survive, many colleges no longer require SAT scores or entrance examinations, because the majority of applicants cant pass them. Our nation has become a huge ship without a rudder, drifting along in a polluted sea of societal insanity, political correctness, immorality, and chaos. Crime of every kind has risen over the past twenty years, especially violent crimes: murder, rape, and assault. In response, to deal with already overcrowded prisons, our courts are dismissing or reducing jail sentences of dangerous criminals. As a result, almost all our major cities have become unsafe places to live, work and raise a family. Reverend, let me stop you there. I happen to be an atheist, and my life without God is not dysfunctional, violent, or wicked as you suggest it is. And, I certainly dont think the United States should be compared to ancient civilizations like Greece or Rome. We are a modern people, a free people with individual rights. We are a civilized and educated people capable of avoiding the pitfalls and mistakes of our past.
